ABOUT COMPANY

Our company operates as a leading machine manufacturer in the industry. We are dedicated to designing, producing, and delivering innovative and high-quality machines to our customers. With our experience and expertise in the machine industry, our goal is to provide our customers with the best solutions.

Our passion for technology and our constant desire for improvement have positioned us as industry leaders. We manufacture machines that meet the highest quality standards by utilizing state-of-the-art equipment and advanced production processes in our manufacturing facility. We strive to deliver reliable, durable, and efficient products to our customers.

Customer focus, innovation, and a commitment to quality are among the core values of our company. Understanding our customers' needs, establishing close relationships with them, and customizing our solutions to meet their specific requirements are our top priorities. By ensuring customer satisfaction at all times, we aim to establish long-term partnerships and contribute to the success of our customers.

Our team consists of expert engineers, designers, and production staff who work diligently on every project to achieve excellence. We value continuous learning and development, staying up-to-date with industry trends, and incorporating the latest technologies. This enables us to offer our customers competitive, state-of-the-art machines that align with the latest advancements.

Our company maintains its strong position in the industry through a commitment to quality, reliability, and customer satisfaction. Our goal is to add value to our customers, fulfill their needs, and help them enhance their business operations.

We would be delighted to have you among our customers. Please get in touch with us, share your requirements, and join us to discover how we can assist you.

VISION & MISSION

Vision

Our vision is to be recognized as a leading machine manufacturer in the industry and provide our customers with the most innovative and high-quality machines worldwide. By closely following technological advancements, we continuously conduct research and development efforts to drive transformation in industrial processes and offer our customers a competitive advantage. With our innovative solutions and excellence-driven approach, we aim to exceed customer expectations

Mission

Our mission is to contribute to the success of our business partners by delivering customized and reliable machine solutions that enable them to enhance their operations. We prioritize customer satisfaction and strive to establish long-term relationships by offering top-quality products. With our customer-centric approach, we collaborate closely with our customers to understand their needs, provide solutions, and offer ongoing support. Our mission is to continuously improve ourselves to become industry leaders and add value to our customers.

MILESTONE

Foundation!

Our Company
founded in 2016.

February 2016

First Export!

Our First export
project was a
grinding machine
to Sibiu, Romania.

February 2017

First Assembly Line!

Our First assembly
line for Bosch
Rexroth, Turkey

April 2018

New Plant!

Our New Plant in
Bursa Organised
Industrial Area,
Turkey

January 2022

Turnover Record!

We recored
turnover more
than 5 million
Euros in 2022

December 2022

WHAT WE DO?

Turnkey Assembly Lines

We deliver assembly lines designed to boost efficiency and flexibility in your production. Our customized solutions help reduce costs, improve product quality, and streamline the entire manufacturing process

Our assembly lines are engineered with advanced technology, offering precision, durability, and seamless integration into existing production systems. We provide tailor-made solutions designed to optimize workflow and ensure consistent quality in manufacturing

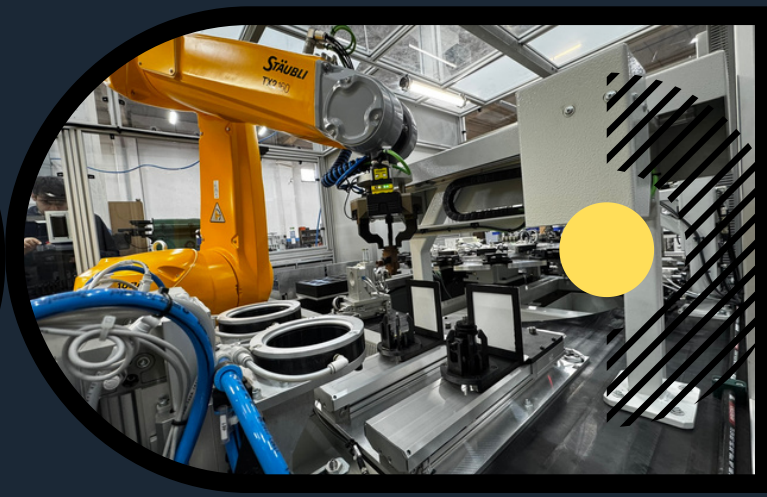

WHAT WE DO?

Special-Purpose Machines

Our expertise is in developing special-purpose machines for various industries, including high-precision measurement systems, camera inspection technologies, automated assembly lines, press machines, grinding solutions, brushing systems, and other customized process equipment designed to meet specific production needs

WHAT WE DO?

Superfinish Face Grinding Machines

We manufacture the Super Finish Face Grinding machines to get best surface quality. Our machines capable to get best shape, length, height, roundness, roughness, flatness, and in other characteristics in microns.

Our Grinding machine concept has availability to produce several part types in one machine with same quality.

In Process, Pre Process and Post process measurements are available to get best capability in parts.

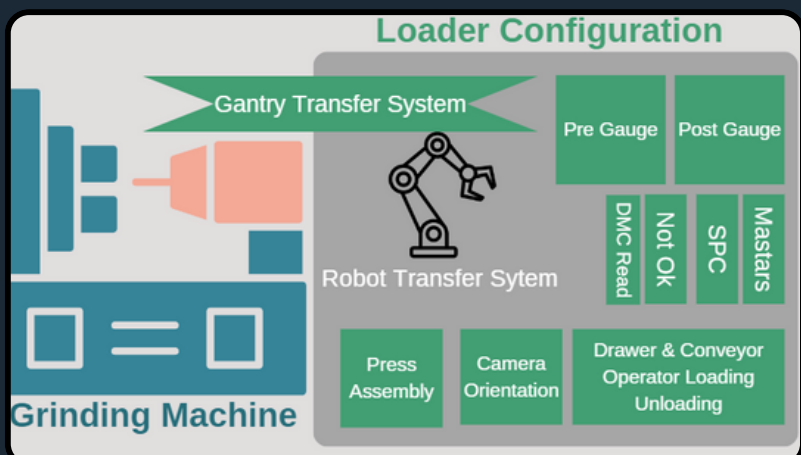

WHAT WE DO?

RETROFIT

We retrofit your existing machines. Retrofit includes renew of the wearing parts which is bearings, rails, axis, shafts, belts, oil dispensers etc. Also we can change the desing of the part holders, chucks to adapt new part types to your existing machines.

LOADERS

We manufacture the loaders for your existing manual or semi auto grinding centers. This loaders can configure with other systems.
